Science

Autumn 1

Group and classify living thing

In this step, children identify and sort animals into groups based on their features. Children will be introduced to the term "vertebrate" to describe an animal with a spine.

Autumn 2

States of matter

Children learn that materials and objects can be grouped into solids, liquids and gases. They look at the properties of solids, liquids and gases and relate these to the common uses of materials. Children also explore the similarities and differences between solids,

Software/Animation/Logo

Geography – Autumn 1

Where does our food come from?

- Identify that different foods grow in different biomes and say why.
- Explain that food imports can be both helpful and harmful.
- Locate countries on a blank world map using an atlas.
- Describe the intentions around trading responsibly.

History – Autumn 2

How have children's lives changed?

- Make inferences and deductions from primary and secondary sources.
- Explain why children needed to work.
- Identify the jobs Tudor and Victorian children had.
- Describe the working conditions of Tudor and Victorian children.

Maths

Numbers: Place value

Count in multiples of 6, 7, and 9. 25 and 1000. Find 1000 more or less than a given number. Recognise the place value of each digit in a four digit number (thousands, hundreds, tens and ones) Order and compare numbers beyond 1000 Identify, represent and estimate numbers using different representations. Round any number to the nearest 10, 100 or 1000 Solve number and practical problems that involve all of the above and with increasingly large positive numbers. Count backwards through zero to include negative numbers. Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.

Addition and subtraction

Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate. Estimate and use inverse operations to check answers to a calculation. Solve addition and subtraction two step problems in contexts, deciding which operations and methods to use and why

Measurement – length and perimeter

Measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres Convert between different units of measure [for example, kilometre to metre]

Multiplication and division

Recall and use multiplication and division facts for multiplication tables up to 12×12 . Count in multiples of 6, 7, and 9. 25 and 1000 Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers. Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects
